Basin Features

Essenza - Sloped Basin

Essenza - Flat Basin

Essenza - Enveloped Bottom Basin

Dialogo

Drain access

Easy access to the drain to remove dirt.

Facile accesso allo scarico per rimuovere lo sporco.

Perfectly insulated hydraulic system

The one-piece stainless steel basin prevents water infiltration.

La vasca monoblocco in acciaio evita le infiltrazioni di acqua.

High impact resistance

High impact resistance thanks to the advanced composite structure.

Alta resistenza agli urti grazie all'avanzata struttura composita.

Sinks cleaning and maintenance

SANITIZING

Porcelain tiles surfaces are extremely easy to sanitize, owing to the physical and mechanical features of this material. Indeed, since they are produced at extremely high temperatures, they prove entirely poreless, which prevents mold, mildew and bacteria from spreading. This means sanitizing products or products with a specific concentration of chemicals capable of eradicating germs and bacteria from surfaces can easily be used, for optimum efficiency and without worrying about damaging the material itself.

ROUTINE CLEANING

For routine cleaning, simply use a damp sponge or a microfiber cloth with hot water and ordinary neutral detergent* then wipe dry with a soft cloth. To remove dirt built up in the corners, we recommend you rub with a nonabrasive soft bristle brush.
Avoid using:
1. Products with waxing, restoring, polishing, brightening properties;
2. Products containing hydrofluoric acid and its derivatives;
3. Metal wire pads (iron and steel pads) or excessively abrasive pads.
CAUTION: Porcelain tiles do not require the application of waxes or detergents with polishing additives, even when the surface is glossy/lapped.

*such as Clean Universal made by Faber Chimica or Fila Clean&Shine for the Italian market - Fila Cleanall for the US market - Fila Brio for all other markets.

EXTRAORDINARY CLEANING

In the event of tough stains, which cannot be removed during routine cleaning operations, we suggest the use of alkaline detergents* for coffee, fruit juice, wine, ink stains and the like, acidic detergents** in the event of limescale residue (or rust), use specific detergents to remove silicone sealant residue***

*such as Clean Degreaser - Deep Degreaser made by Faber Chimica or Fila Powerclean for the Italian market - Fila Hobby for other markets.
**such as Clean Limescale - Tile Cleaner made by Faber Chimica or Fila Deepclean for the Italian market - Fila Via Bagno for other markets.
***such as Epoxy Cleaner made by Faber Chimica or Fila Zerosil.

STEEL SURFACES

Stainless steel is an extremely strong material and is not subject to the corrosive action of oxidation. However, specific products should be used for cleaning it.
In addition, to avoid damaging the surface, do not use:
1. sponges or scourers that could cause irreversible scratches and abrasions;
2. aggressive chemicals;
3. cleaning products based on ammonia, bleach or chlorine.

LACQUERED SURFACES

Daily cleaning and maintenance of the lacquered surfaces of the drawer unit.
To maintain lacquered surfaces for as long as possible and in the best possible condition, proceed as follows:
1. Treat the stain promptly, allowing it to remain in contact with the surface for as little time as possible.
2. Only use a moistened microfiber cloth, white if possible. Do not use sponges or rags that could scratch the surface.
3. Use a NON-abrasive, neutral liquid soap solution. Marseille soap is particularly suitable. Simply dilute a few flakes in a bowl with lukewarm water, lightly dampen the cloth and wipe the surface.
4. After wiping, it is best to rinse and dry quickly, taking care to use a dry cloth different from the one used for cleaning. Air drying is not recommended because halos or traces of water may remain.
5. Do not use organic solvents such as acetone and alcohol, do not use detergents containing strong acids, kitchen detergents and substances containing ammonia, trichloroethylene and bleach.

IGIENIZZAZIONE

Le superfici in gres porcellanato sono estremamente facili da igienizzare, grazie alle caratteristiche fisico-meccaniche di questo materiale. Infatti, essendo prodotta ad altissime temperature, risulta totalmente priva di pori, fatto che impedisce a muffe e batteri di proliferare. È possibile utilizzare pertanto senza problemi prodotti igienizzanti ossia con una determinata concentrazione di sostanze in grado di eliminare germi e batteri dalle superfici, con la massima efficacia e senza temere di rovinare il materiale stesso.

PULIZIA ORDINARIA

Per la pulizia quotidiana è sufficiente utilizzare una spugna inumidita o un panno in microfibra con acqua calda e un comune detergente neutro* asciugando con un panno morbido. Per la rimozione di sporco accumulatosi negli angoli si suggerisce di strofinare con uno spazzolino con setole morbide non abrasive.
Evitare l'utilizzo di:
1. Prodotti con caratteristiche ceranti, ravvivanti, lucidanti, brillantanti;
2. Prodotti che contengono acido fluoridrico e suoi derivati;
3. Pagliette di metallo (spugnette di ferro e acciaio) o eccessivamente abrasive.
ATTENZIONE: il gres porcellanato non richiede l'applicazione di cere o di detergenti con additivi lucidanti anche quando ha una superficie lucida/lappata.

*tipo Clean Universal della Faber Chimica oppure Fila Clean&Shine per mercato IT - Fila Cleanall per mercato USA - Fila Brio per tutti gli altri mercati.

PULIZIA STRAORDINARIA

Nel caso di macchie ostinate, non rimovibili con la pulizia ordinaria, si suggerisce di utilizzare detergenti a base alcalina* per caffè, succhi di frutta, vino, inchiostro, ed etc.
detergenti a base acida** nel caso di residui di calcare (o ruggine) utilizzare detergenti specifici per la rimozione di residui di sigillanti silconici***

*tipo Clean Degreaser - Deep Degreaser della Faber Chimica oppure Fila Powerclean per mercato IT - Fila Hobby per gli altri mercati.
**tipo Clean Limescale - Tile Cleaner della Faber Chimica oppure Fila Deepclean per il mercato IT - Fila Via Bagno per gli altri mercati.
***tipo Epoxy Cleaner della Faber Chimica oppure Fila Zerosil.

SUPERFICI IN ACCIAIO

L'acciaio inox è un materiale estremamente resistente e non è soggetto all'azione corrosiva dell'ossidazione. Tuttavia per la pulizia è opportuno adoperare prodotti specifici.
Inoltre per evitare il danneggiamento della superficie non utilizzare:
1. spugne o pagliette metalliche che potrebbero generare graffi ed abrasioni irreversibili;
2. sostanze chimiche aggressive;
3. prodotti per la pulizia a base di ammoniaca, candeggina o cloro.

SUPERFICI LACCATE

Pulizia e manutenzione quotidiana delle superfici laccate della cassettera.
Per conservare le superfici laccate per il maggior tempo e nella migliore condizione possibile, è necessario rispettare e seguire i seguenti punti:
1. Agire tempestivamente sulla macchia, lasciando che questa rimanga il minor tempo possibile a contatto con la superficie;
2. Utilizzare esclusivamente un panno in microfibra inumidito, possibilmente bianco. Non utilizzare spugne o stracci che potrebbero graffiare la superficie;
3. Utilizzare una soluzione di sapone liquido neutro NON abrasivo.
Particolarmente indicato è il Sapone di Marsiglia, sarà sufficiente diluire alcune scaglie in una bacinella d'acqua tiepida, bagnare leggermente il panno e passarlo sulla superficie;
4. Dopo aver passato il panno, è bene procedere con le operazioni di risciacquo e asciugatura in maniera rapida, avendo cura di usare un panno asciutto diverso da quello utilizzato per la pulizia. L'asciugatura all'aria è sconsigliata perché potrebbero rimanere aloni o tracce di acqua;
5. Non usare solventi organici come acetone ed alcool, non usare detergenti contenenti acidi forti, detergenti per cucina e sostanze contenenti ammoniaca, trielina e candeggina.

Notes

CAUTION

Avoid accidental shocks that could result in chipping or irreversible damage. In the event of breakage, check that the structural parts are not damaged and, if necessary, discard the item.
Avoid any improper use of the items and their components. Some removable parts could be used as blunt objects.
Be careful: sharp edges and possible razor-sharp surfaces.

FR-DE-ES-RU

ATTENZIONE

Evitare urti accidentali che potrebbero provocare sbecature o lesioni non ripristinabili. In presenza di rotture verificare che le parti strutturali non siano compromesse e nel caso mettere fuori utilizzo l'oggetto.
Evitare qualsiasi uso improprio degli articoli e dei loro componenti. Alcune parti removibili potrebbero essere utilizzate come oggetti contundenti.
Prestare attenzione: spigoli acuminati e possibile presenza di superfici taglienti.
